

Divestment Services

Asset divestments (farm-outs, asset sales or trades) require time, effort, resources and patience. EzDataRoom, with a long history of success, has services to help you

Project Promotion

Finding that elusive buyer is vital. With 1300+ companies and 3000+ key decision makers registered to be notified of new projects, EzDataRoom's email alert program will introduce your project to the right people in the right companies right from the start.

Inclusion of your project on our Active Project web site www.ezdataroom.com and in our monthly update email to the industry compliments the project promotion.

Online Data Rooms

Removing the obstacles of time and travel encourage more companies to review a project. No travel, no hotels, no visas and a longer review period are a significant convenience to interested parties.

Unique technology allows the inclusion of 2D/3D seismic data, digital well logs, legal, commercial and supporting technical documents for an easy (but secure) online review post CA, from anywhere in the world.

Filter out the less interested companies without wasting your time and resources. Serious companies visit you, already fully conversant with your project, for negotiations.

Unique Technology

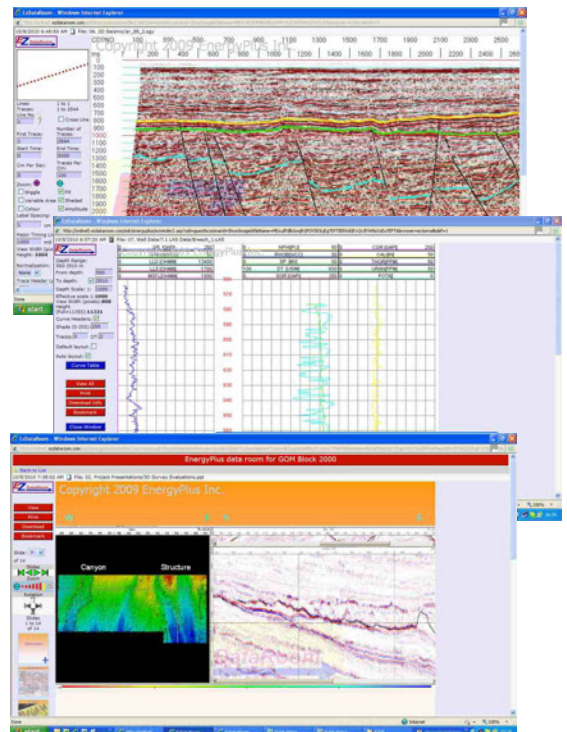

- No file downloads required to view everything
- No file size limit, view multi-gigabyte files
- Include 2D/3D segy seismic data with interpretation
- Include digital well logs with geological markers
- No re-formatting of files, display the original
- Comprehensive search facilities
- No special software just a standard web browser

Enhanced Security

- No access to ODR unless granted by seller (post CA)
- No file downloads to users, unless authorised
- Watermarking of pages for security
- Monitor site user activity with our statistics package

Convenient & Efficient

- No travelling required
- Available 24/7 to suit busy schedules
- Many companies access the site at the same time
- No in-house physical data room initially required
- No supervision time, you focus on deal making
- Customised site live soon after receipt of files
- Simple to use, just point and click
